

THE CLAIMS

A detailed listing of all of originally filed Claims 1 – 30 and newly submitted Claims 31 and 32 is provided below. A status identifier is provided for each claim in a parenthetical expression following each claim number.

1. (Currently Amended) In connection with a computer having a user interface, a method comprising:

displaying an advisory that an action for an object associated with a loading webpage is blocked; and

displaying a description of the object ~~in response to a user action;~~
and

displaying an interactive prompt corresponding to the object,
wherein the advisory is displayed in a modeless prompt.

2. (Currently Amended) A method according to Claim 1, ~~further comprising displaying an~~ wherein the interactive prompt enables user interaction to unblock the action ~~in response to a further user action.~~

Claims 3 and 4: Canceled

5. (Currently Amended) A method, ~~according to Claim 1~~ comprising:

displaying an advisory that an action for an object associated with a webpage is blocked; and

displaying a description of the object,

wherein the description of the object is displayed in ~~a window containing~~ connection with a sequential listing of blocked objects associated with the ~~loading~~ webpage.

6. (Currently Amended) A method according to Claim 1, wherein the description of the object is displayed in ~~a window containing~~ accordance with ~~a sequential listing~~ descriptions of further blocked objects associated with the ~~loading~~ webpage, and

the method further comprises ~~displaying another interactive prompt to unblock an action for~~ enabling at least one of the blocked object and the further blocked objects ~~corresponding to the blocked objects in the window in response to a further user action~~ to be acted upon.

7. (Currently Amended) A method according to Claim 1, wherein the displaying the description of the object is performed in response to a user action ~~includes hovering a pointer over a portion of the advisory.~~

8. (Currently Amended) A method according to Claim 1, wherein the displaying the description of the object is performed in

response to a user action ~~includes~~ including clicking as a pointer hovers over a portion of the advisory.

9. (Currently Amended) A method according to Claim 1, wherein the object is ~~embedded in~~ associated with the webpage, and includes any one of downloadable code, ~~a link to~~ a URL, a popup window, ~~graphic data, a video file, an audio file, and a text~~ or a link to a file.

10. (Currently Amended) A method according to Claim 1, wherein the object is a link to an object on a remote server, wherein further the object on the remote server includes any one of downloadable code, ~~a URL~~ script, a popup window, ~~graphic data, a link~~ to a video file, a link to an audio file, and or a link to a text file.

11. (Currently Amended) In connection with a computer, a user interface to provide a prompt in accordance with detected objects associated with a webpage, comprising:

a text field to display an advisory that an action for an object associated with a webpage has been suppressed; and

an interface to display a description of the object ~~in response to user interaction with the text field; and~~

~~a prompt to activate the action in response to further user interaction.~~

12. (Original) A user interface according to Claim 11, wherein the text field displaces the webpage.

13. (Currently Amended) A user interface according to Claim 11, ~~wherein the user interaction with the text field includes hovering a cursor over a portion of the text field~~ further comprising a modal prompt to enable user interaction with the text field to activate the action.

14. (Currently Amended) A user interface according to Claim 11, ~~wherein the user interaction with the text field includes clicking~~ further comprising a modal prompt to enable a user to activate the action as a cursor points to a portion of the text field.

15. (Currently Amended) A user interface according to Claim 11, wherein the description of the object is ~~included in~~ displayed in association with a cascading listing of objects associated with the web page having corresponding actions ~~blocked~~ suppressed.

Claims 16 and 17: Canceled

18. (Currently Amended) A user interface according to Claim 11, wherein the object is ~~embedded in~~ associated with the webpage,

and includes any one of downloadable code, ~~a link to a URL, a popup window, graphic data, a video file, an audio file, and a text~~ script, or a linked file.

19. (Currently Amended) A user interface according to Claim 11, wherein the object is a link to an object on a remote server, wherein further the object on the remote server includes any one of downloadable code, ~~a URL, a popup window, graphic data~~ script, a link to a video file, a link to an audio file, and or a link to a text file.

20. (Currently Amended) A user interface according to Claim 11, wherein the ~~prompt~~ text field is a modeless prompt.

21. (Currently Amended) A computer-readable medium having one or more computer-executable instructions that, when read, cause one or more processors to:

display an advisory that an action for an object associated with a webpage is blocked; and

display a description of the object ~~in response to a user action;~~

22. (Currently Amended) A computer-readable medium according to Claim 21, further comprising one or more instructions that cause one or more processors to display an interactive prompt

corresponding to the block to unblock enable the action to be unblocked in response to a further user action.

Claims 23 – 25: Canceled

26. (Currently Amended) A computer-readable medium according to Claim 21,

wherein the description of the object is displayed ~~in a window~~ along with descriptions of further objects associated with the webpage having an action blocked, and

the computer-readable medium further comprises one or more instructions causing one or more processors to display another interactive prompt to ~~unblock an~~ display the action for one of the objects corresponding to the ~~blocked objects in the window in response to a further user action~~ object and the actions corresponding to the further objects.

27. (Currently Amended) A computer-readable medium according to Claim 21, wherein the one or more instructions cause the one or more processors to enable a user action ~~includes hovering a pointer over a portion of the advisory to unblock at least one of the action corresponding to the object or the actions corresponding to the further objects~~.

28. (Currently Amended) A computer-readable medium according to Claim 21, wherein the one or more instructions cause the one or more processors to display the description of the object in response to a user action includes including clicking as a pointer hovers over a portion of the advisory.

29. (Currently Amended) A computer-readable medium according to Claim 21, wherein the object is embedded in the webpage, and includes any one of downloadable code, a ~~URL script~~, a popup window, ~~graphic data, a video file, an audio file, and a text~~ and a linked file.

30. (Currently Amended) A computer-readable medium according to Claim 21, wherein the object is a link to an object on a remote server, and wherein further the object ~~on the remote server~~ includes any one of downloadable code, a ~~URL script~~, a popup window, ~~graphic data, a video file, an audio file, and a text~~ and a linked file.

31. (New) A method according to Claim 1,
wherein the description of the object is displayed in accordance with descriptions of further blocked objects associated with the webpage, and
the method further comprises enabling an action that is appropriate for a particular one of at least the blocked object and the further blocked objects.

32. (New) A user interface according to Claim 11, wherein the description of the object and a description of the action for the object are displayed in association with a listing of further objects and suppressed actions respectively corresponding to the further objects.
